Dear Hiring Manager,
Human Resources Department Orsted Education
Surabaya, East Java

Subject : Application for Tentor TKA SD

My name is Cahyani Dini Setiowati, an active undergraduate student majoring in Mathematics at Institut Teknologi Sepuluh Nopember (ITS) Surabaya. I am writing to express my strong interest in Tutor TKA SD at Orsted Education.

I am a sixth-semester mathematics major with experience in tutoring students. Currently, I have been tutoring a middle school student following the Cambridge curriculum for about six months. The student has shown significant progress, with their test score improving from 60 to 88. I also gained experience tutoring preschool through elementary school students in early 2026. This experience serves as a strong foundation for my consideration as a tutor for preschool through elementary school students.

In addition to my formal teaching experience, my background in college and organizational activities has shaped me into an adaptable, communicative, and well-prepared individual. I have experience designing educational programs and developing interactive instructional materials for PKM activities I've participated in. With this background, I'm able to create creative learning methods based on visual and game-based approaches to help elementary school-aged children understand the material more easily without getting bored. I am also accustomed to practicing patience and empathy, which I believe are key to guiding children..

I have enclosed my Curriculum Vitae and portfolio for your consideration. I would welcome the opportunity to discuss how my skills and background can add value to Orsted Education in an interview. Thank you for your time and consideration.

Sincerely,

Cahyani Dini Setiowati
